

ICT@LEPS

With Google Drive and Google Classroom it is easy to share photos and videos with other members of LEPS. The best thing about Google Drive and cloud storage is that we can share files simply by providing a URL linking to the file's location. No more needing to compress files or experience bounce backs because files are too large!

Click below access video tutorials:

[How to upload images from a computer to Google Drive and then share it with teachers and/or students.](#)

[Upload images/videos from a mobile device to Google Drive.](#)

Stay safe,

Tom Burke
